

# i.MX 6SoloLite Processors – Single-Core, Low-Power, EPD Controller, Arm<sup>®</sup> Cortex<sup>®</sup>-A9 Core

## i.MX6SL

Last Updated: Aug 29, 2023

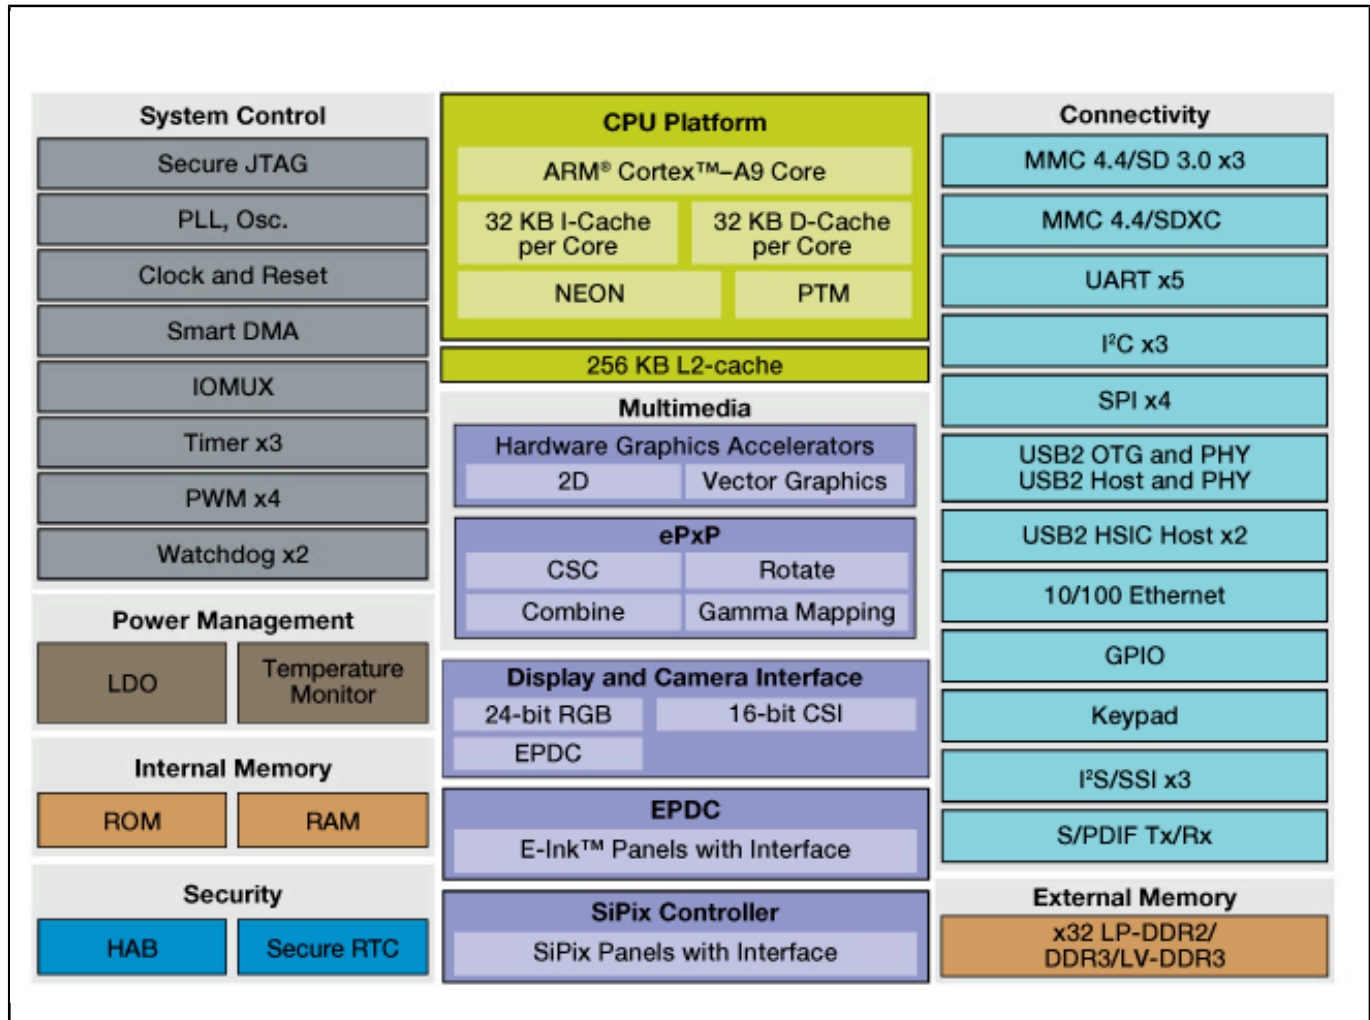

The i.MX 6 series of applications processors combines scalable platforms with broad levels of integration and power-efficient processing capabilities particularly suited to multimedia applications. The i.MX 6SoloLite processor features:

- Enhanced capabilities of high-tier portable applications by fulfilling MIPS needs of operations systems and games
- Multilevel memory system
- Smart speed technology that enables the designer to deliver a feature-rich product, requiring levels of power far lower than industry expectations
- Dynamic voltage and frequency scaling
- Powerful graphics acceleration
- Interface flexibility
- Integrated power management throughout the device
- Advanced hardware-enabled security

The i.MX 6SoloLite is supported by companion NXP power management ICs (PMIC) [MMPF0100](#), [MMPF0200](#), [PF3000](#) and [PF3001](#).

i.MX 6 applications processors are part of NXP's EdgeVerse™ [edge computing](#) platform.
